

Correction to: Effectiveness of Goreisan Herbal Medicine in Preventing Recurrence After Chronic Subdural Hematoma Surgery: A Systematic Review and Meta-Analysis

Maeda Toshiyoshi, Jingchao Ma & Ye Zhao

Correction to: Journal of Clinical Question <https://doi.org/10.69854/jcq.2024.0006>, published online 22 October 2024.

In the version of this Article initially published, the direction of the between-group difference in antithrombotic use was incorrectly described in the Results. In addition, the P value and I^2 for the overall analysis were incorrectly reported using values from the test for subgroup differences. The corrected text reads: “The pooled analysis of six studies indicated that the Goreisan group had a higher prevalence of antiplatelet use, with an RD of 0.07 (95% CI, 0.03–0.11; $P < 0.001$; $I^2 = 0\%$). In contrast, no significant difference in anticoagulant use was observed between the Goreisan and control groups (RD, 0.01; 95% CI, –0.03 to 0.06; $P = 0.55$; $I^2 = 46\%$). Overall, antithrombotic use was higher in the Goreisan group (RD, 0.03; 95% CI, 0.01–0.06; $P = 0.01$; $I^2 = 34\%$).”

Figure 3 and the underlying analyses are unchanged. These corrections do not affect the conclusions of the Article.
