

Gleam Publishing License Agreement

Authors whose manuscripts are accepted will be asked to accept our publication terms as part of the publication process. This is usually done through our online rights portal. As part of these publication terms, authors permit us to publish their article for open access, which means that the article will be released under a Creative Commons license, allowing others to view and reuse the content.

As an aid to our authors, the following paragraphs provide brief explanations of the Creative Commons licenses that apply to articles published in Gleam Publishing-published journals and the rationale for why we have chosen these licenses.

The Creative Commons Attribution License (CC BY), of which [CC BY 4.0](#) is the most recent version, was developed to facilitate open access as defined in the movement's founding documents, such as the 2003 [Berlin Declaration](#). Open-access content has to be freely available online. By licensing their work under CC BY, authors grant users the right to unrestricted dissemination and re-use of the work, with only one provision: proper attribution is given to authors. This liberal licensing is best suited to facilitate the transfer and growth of scientific knowledge. Therefore, the Open Access Scholarly Publishers Association (OASPA) strongly recommends the use of CC BY for the open-access publication of research literature, and many research funders worldwide either recommend or mandate that research they have supported be published under CC BY. Examples of such policies include funders as diverse as the [Wellcome Trust](#), the [Australian Government](#), the European Commission's [Horizon 2020](#) framework program, or the [Bill & Melinda Gates Foundation](#).

The default use of the [Creative Commons 1.0 Public Domain Dedication waiver](#) (CC0 or CC zero) for data published within articles follows the same logic, facilitating maximum benefit and the broadest possible re-use of knowledge. It is also the case that in some jurisdictions, copyright does not apply to data. CC0 waives all potential copyrights and the attribution requirement to the extent legally possible. The waiver applies to data, not to the presentation of data. If, for instance, a table or figure displaying research data is reproduced, CC BY and the requirement to attribute applies. However, new insights are increasingly possible through big data techniques, such as data mining, that harness the entire corpus of digital data. In such cases, attribution is often technically infeasible due to the sheer mass of the data mined, making CC0 the most suitable licensing tool for

research outputs generated from such innovative techniques.

It is essential to differentiate between legal requirements and [community norms](#). It is, first and foremost, a community norm, not a law, that attribution mostly takes the form of citation within the scientific community. It is also a community norm that researchers are expected to refer to their sources, usually using citations. Across all cases of research reuse (including data, code, etc.), community norms will apply as appropriate for the situation: researchers will cite their sources where feasible, regardless of the applicable license. CC0, therefore, covers those instances that lie beyond long-established community norms. The overall effect of CC0 for data enables further use without any loss of citations.

In the following, we provide the licenses' summaries as they can be found on the Creative Commons website. The [Creative Commons Attribution License 4.0](#) provides the following summary (where 'you' equals 'the user'):

You are free to:

- ✓ Share— copy and redistribute the material in any medium or format.
- ✓ Adapt— remix, transform, and build upon the material for any purpose, even commercially.

The licensor cannot revoke these freedoms as long as you follow the license terms.

Under the following terms:

- ✓ Attribution— you must give appropriate credit, provide a link to the license, and indicate if changes were made. You may do so in any reasonable manner, but not in any way that suggests the licensor endorses you or your use.
- ✓ No additional restrictions—you may not apply legal terms or technological measures that legally restrict others from doing anything the license permits.

Notices

You do not have to comply with the license for elements of the material in the public domain or where your use is permitted by an applicable exception or limitation.

Gleam Publishing

No warranties are given. The license may not give you all of the permissions necessary for your intended use. For example, other rights such as publicity, privacy, or moral rights may limit how you use the material.

Please note: For the terms set in italics in the summary above further details are provided on the Creative Commons web page from which the summary is taken (<http://creativecommons.org/licenses/by/4.0/>).

The [Creative Commons 1.0 Public Domain Dedication waiver](#) provides the following summary:

No copyright

The person who associated a work with this deed has dedicated the work to the public domain by waiving all of his or her rights to the work worldwide under copyright law, including all related and neighboring rights, to the extent allowed by law.

You can copy, modify, distribute, and perform the work, even for commercial purposes, without asking permission. See Other information below.

Other information

CC0 does not affect the patent or trademark rights of any person, nor are the rights that other persons may have in the work or in how the work is used, such as publicity or privacy rights.

Unless expressly stated otherwise, the person who associated a work with this deed makes no warranties about the work and disclaims liability for all work uses to the fullest extent permitted by applicable law.

When using or citing the work, you should not imply endorsement by the author or the affirmer.

Please note: for the terms in italics in the summary above, further details are provided on the Creative Commons web page from which the summary is taken (<http://creativecommons.org/publicdomain/zero/1/>).
